C = NRCxy

Real Income

Real Wealth

Expectations

The Consumption Function

a

b

$$C = \text{intercept} + \text{MPC}_x Y$$

Consumption Depends on:

The Consumption Function

$$C = \text{MPC} \times Y$$

$$C = a + bY$$

Real Income

The higher your Income (Y) the more you spend (C)

Real Wealth

Expectations

Wealthier/
optimistic
individuals spend
more: higher
intercept

$$C = \underbrace{a}_{\text{Portion of consumption independent from income}} + \underbrace{b \text{MPC} \times Y}_{\text{Portion of consumption induced by income}}$$

Autonomous consumption induced consumption

The Consumption Function: $C = a + MPCY$
