If the Government wants to close a recessionary gap, the government can **Increase Spending** or **Decrease Taxes**

Are these two alternatives **equally** effective?

Both cause the same change in consumer spending

Both **increase** the Government's Budget
Deficit by the **same** amount

Increasing Government Spending cause a **larger**
increase in GDP

No!

If the Government wants to close a recessionary gap, the government can **Increase Spending** or **Decrease Taxes**

Are these two alternatives **equally** effective?

Both cause the **same** change in consumer spending

Both **increase** the Government's Budget

Deficit by the **same** amount

No!

Increasing Government Spending cause a **larger**
increase in GDP

Can the Government increase GDP without
increasing the budget deficit?
