You purchased Google stock at \$200 in 2012 and sold it for \$600 in 2014

Tax on Capital Gains is 30%

Tax you owe

$$\$4000 \times 0.30 = 1200$$

$$\text{Capital Gain} = 600 - 200 = \$400$$

CPI = 200

2012

CPI = 250

2014

You pay 34%
instead of the 30%
you are supposed
to pay by law

$$\frac{120}{350} \times 100 = 34\% \text{ effective tax!}$$

Your **Real** Capital Gain = **600** - **250** = \$350

The government still makes you pay **\$120**

$$\frac{250}{200} = 1.25$$
