A red speech bubble with a white drop shadow, pointing towards the bottom right. Inside the bubble, the text "As we get closer to a vaccine, people become more confident about finding a job" is written in white, sans-serif font, centered and arranged in four lines.

As we get closer to a
vaccine, people
become more confident
about finding a job

Aug 8.4%

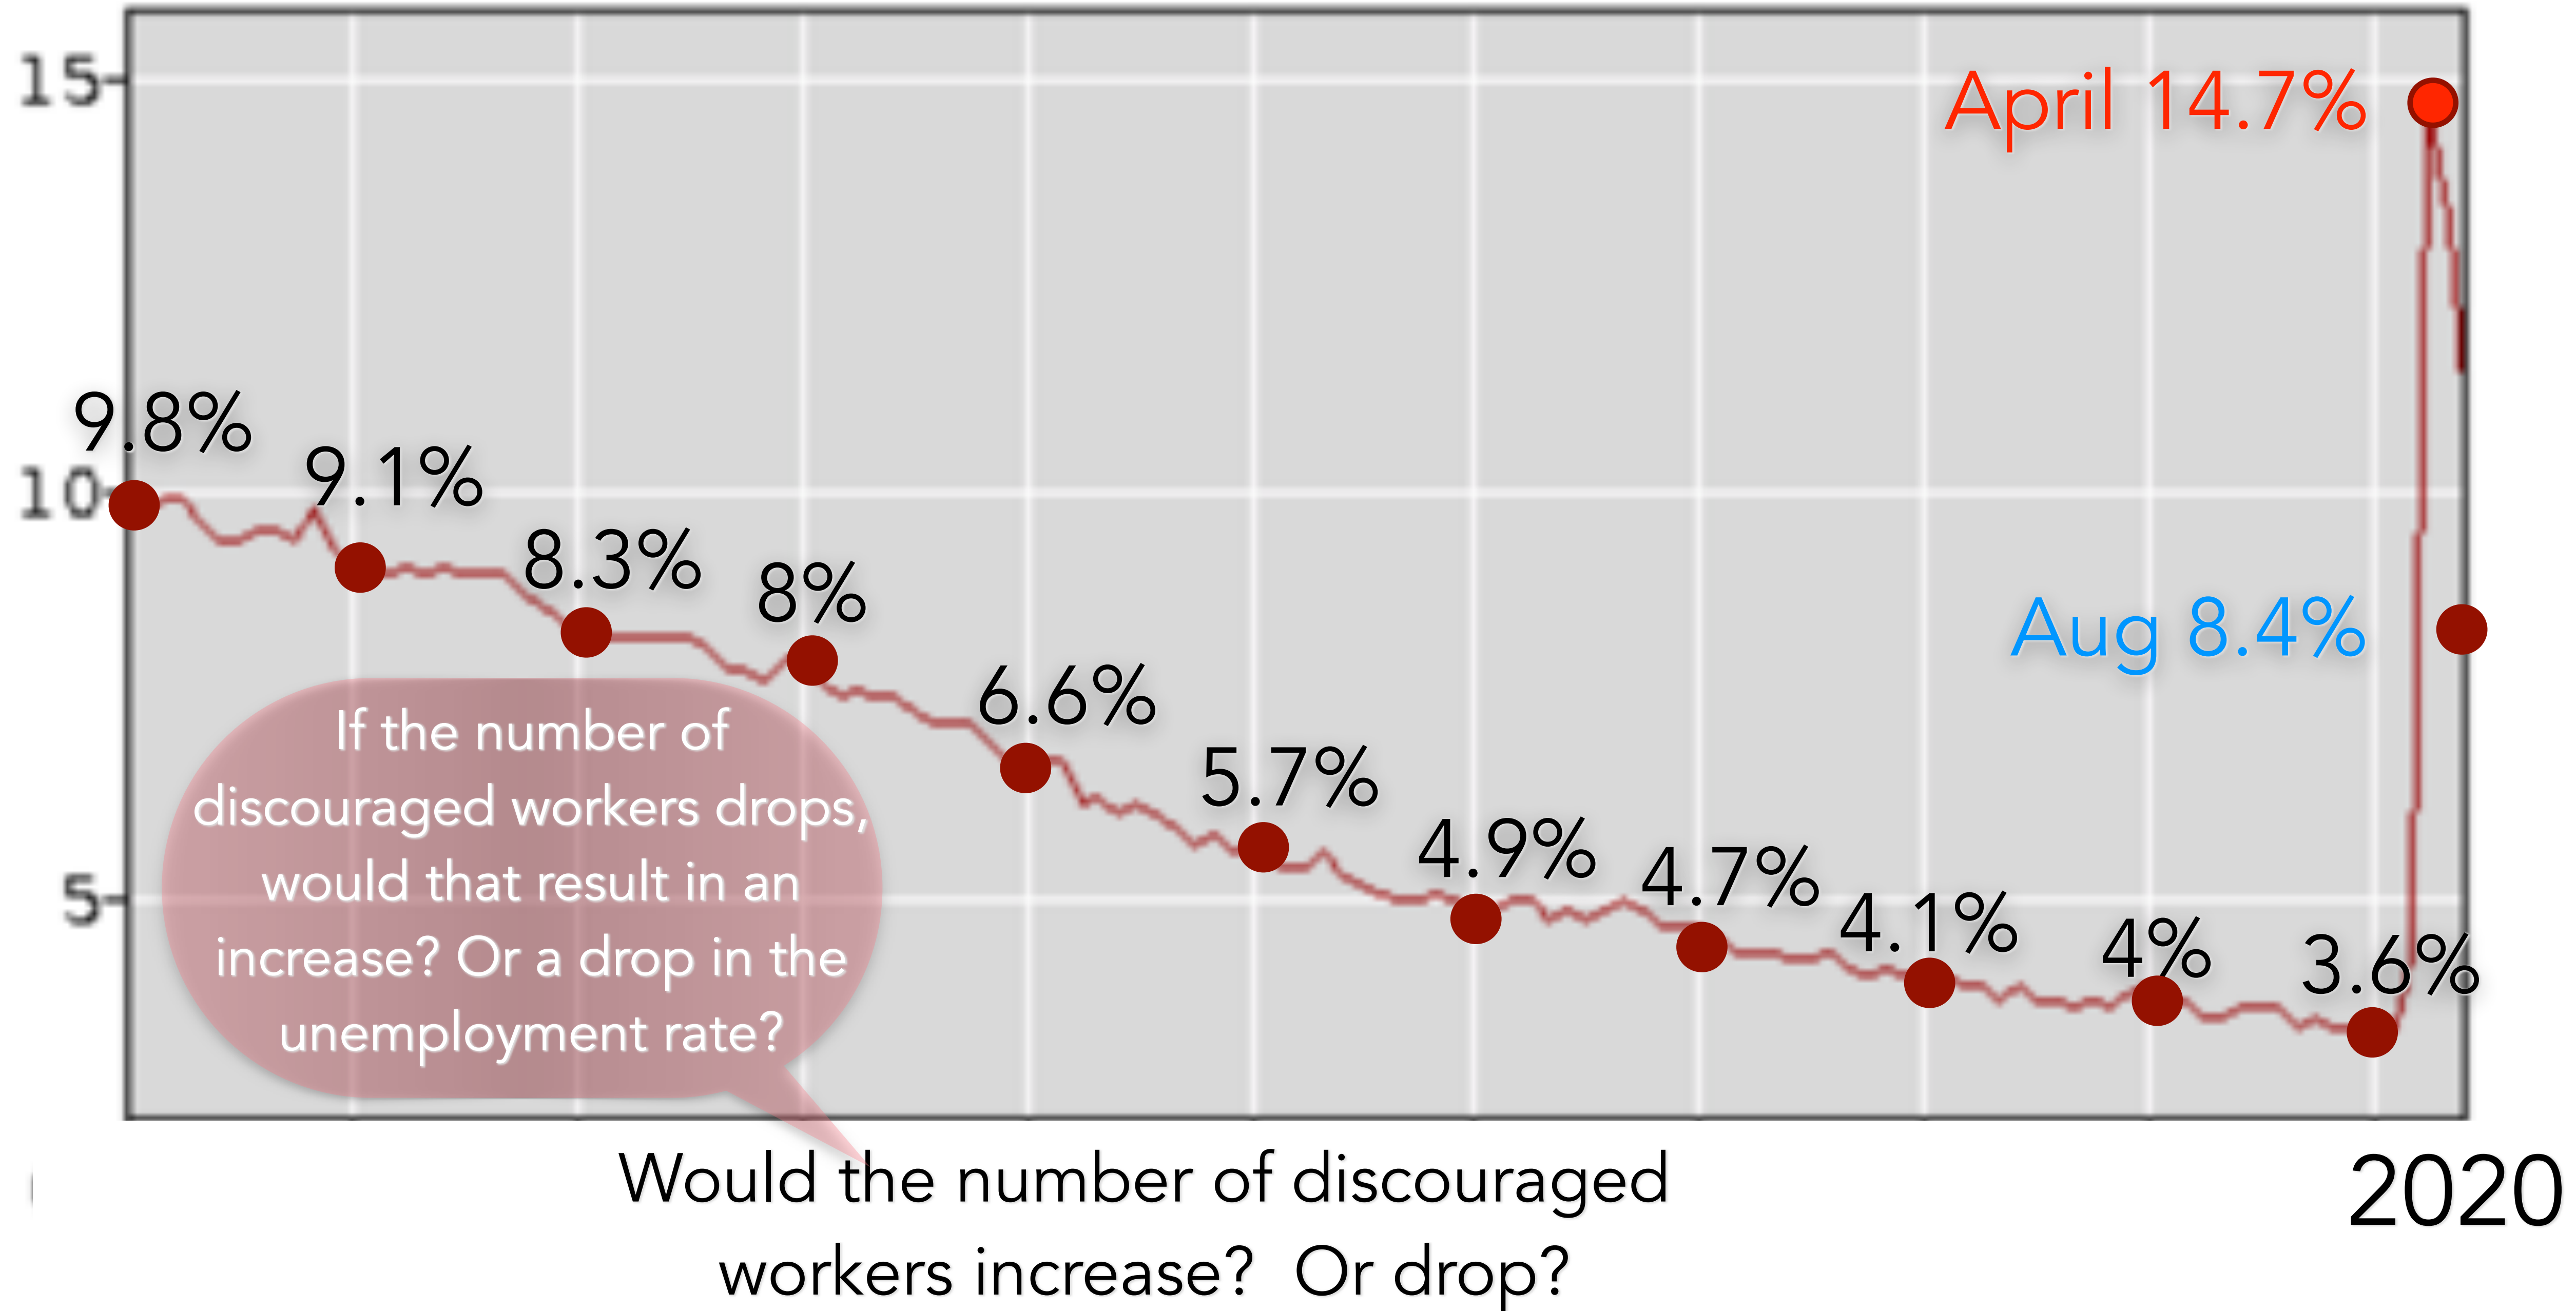

If the number of discouraged workers drops, would that result in an increase? Or a drop in the unemployment rate?

Would the number of discouraged
workers increase? Or drop?

Unemployment Rate U.S.

Is Unemployment Measured Correctly?
