3. Unemployment rate, by race and ethnicity

The decline was broad based across racial and ethnic groups and was particularly large for Hispanics and African Americans (figure 3). While these recent declines brought the gaps between Hispanic and African American unemployment rates and those of whites and Asians to near historic lows, the gaps nevertheless remain and largely reflect long-standing structural issues.

NOTE: Unemployment rate measures total unemployed as a percentage of the labor force. Persons whose ethnicity is identified as Hispanic or Latino may be of any race. Small sample sizes preclude reliable estimates for Native Americans and other groups for which monthly data are not reported by the Bureau of Labor Statistics.
