

Because these goods and services were not **paid for** during the pandemic
that production was not added as GDP for 2020

Before the stay home order Claudia:

- Ate all her meals out
- Paid a gardener
- Paid to have her hair done
- Paid a house cleaning service
- Paid to have her dogs walked
- Paid to have her bike serviced
- Paid to have her dogs groomed
- Paid for Bikram Yoga classes

During the “stay home order” she:

- Cooked all her meals
- Cut the grass
- Cut and colored her hair
- Cleaned her house
- Walked her dogs
- Fixed her own bicycle
- Groomed her dogs
- Did yoga in her patio

Before:

All that production
was added into
GDP

After:

All that production
was NOT added
into GDP

The same goods and services were in fact **produced**, they were not **counted** as production during the pandemic because they were not paid for (they had no price).

GDP = Purchase of new goods and services
