**C** = **a** + **MPC**<sub>x</sub> **Y**

Choose *any* two points

$$\Delta Y = 1000$$

$$\Delta C = 750$$

**MPC = ΔC / ΔY**

Calculating the slope

**MPC = 750/1000**

**MPC**

MPC  $\equiv$  0.75

When income increase by 1,000

Consumption  
increase by 750

0.

7

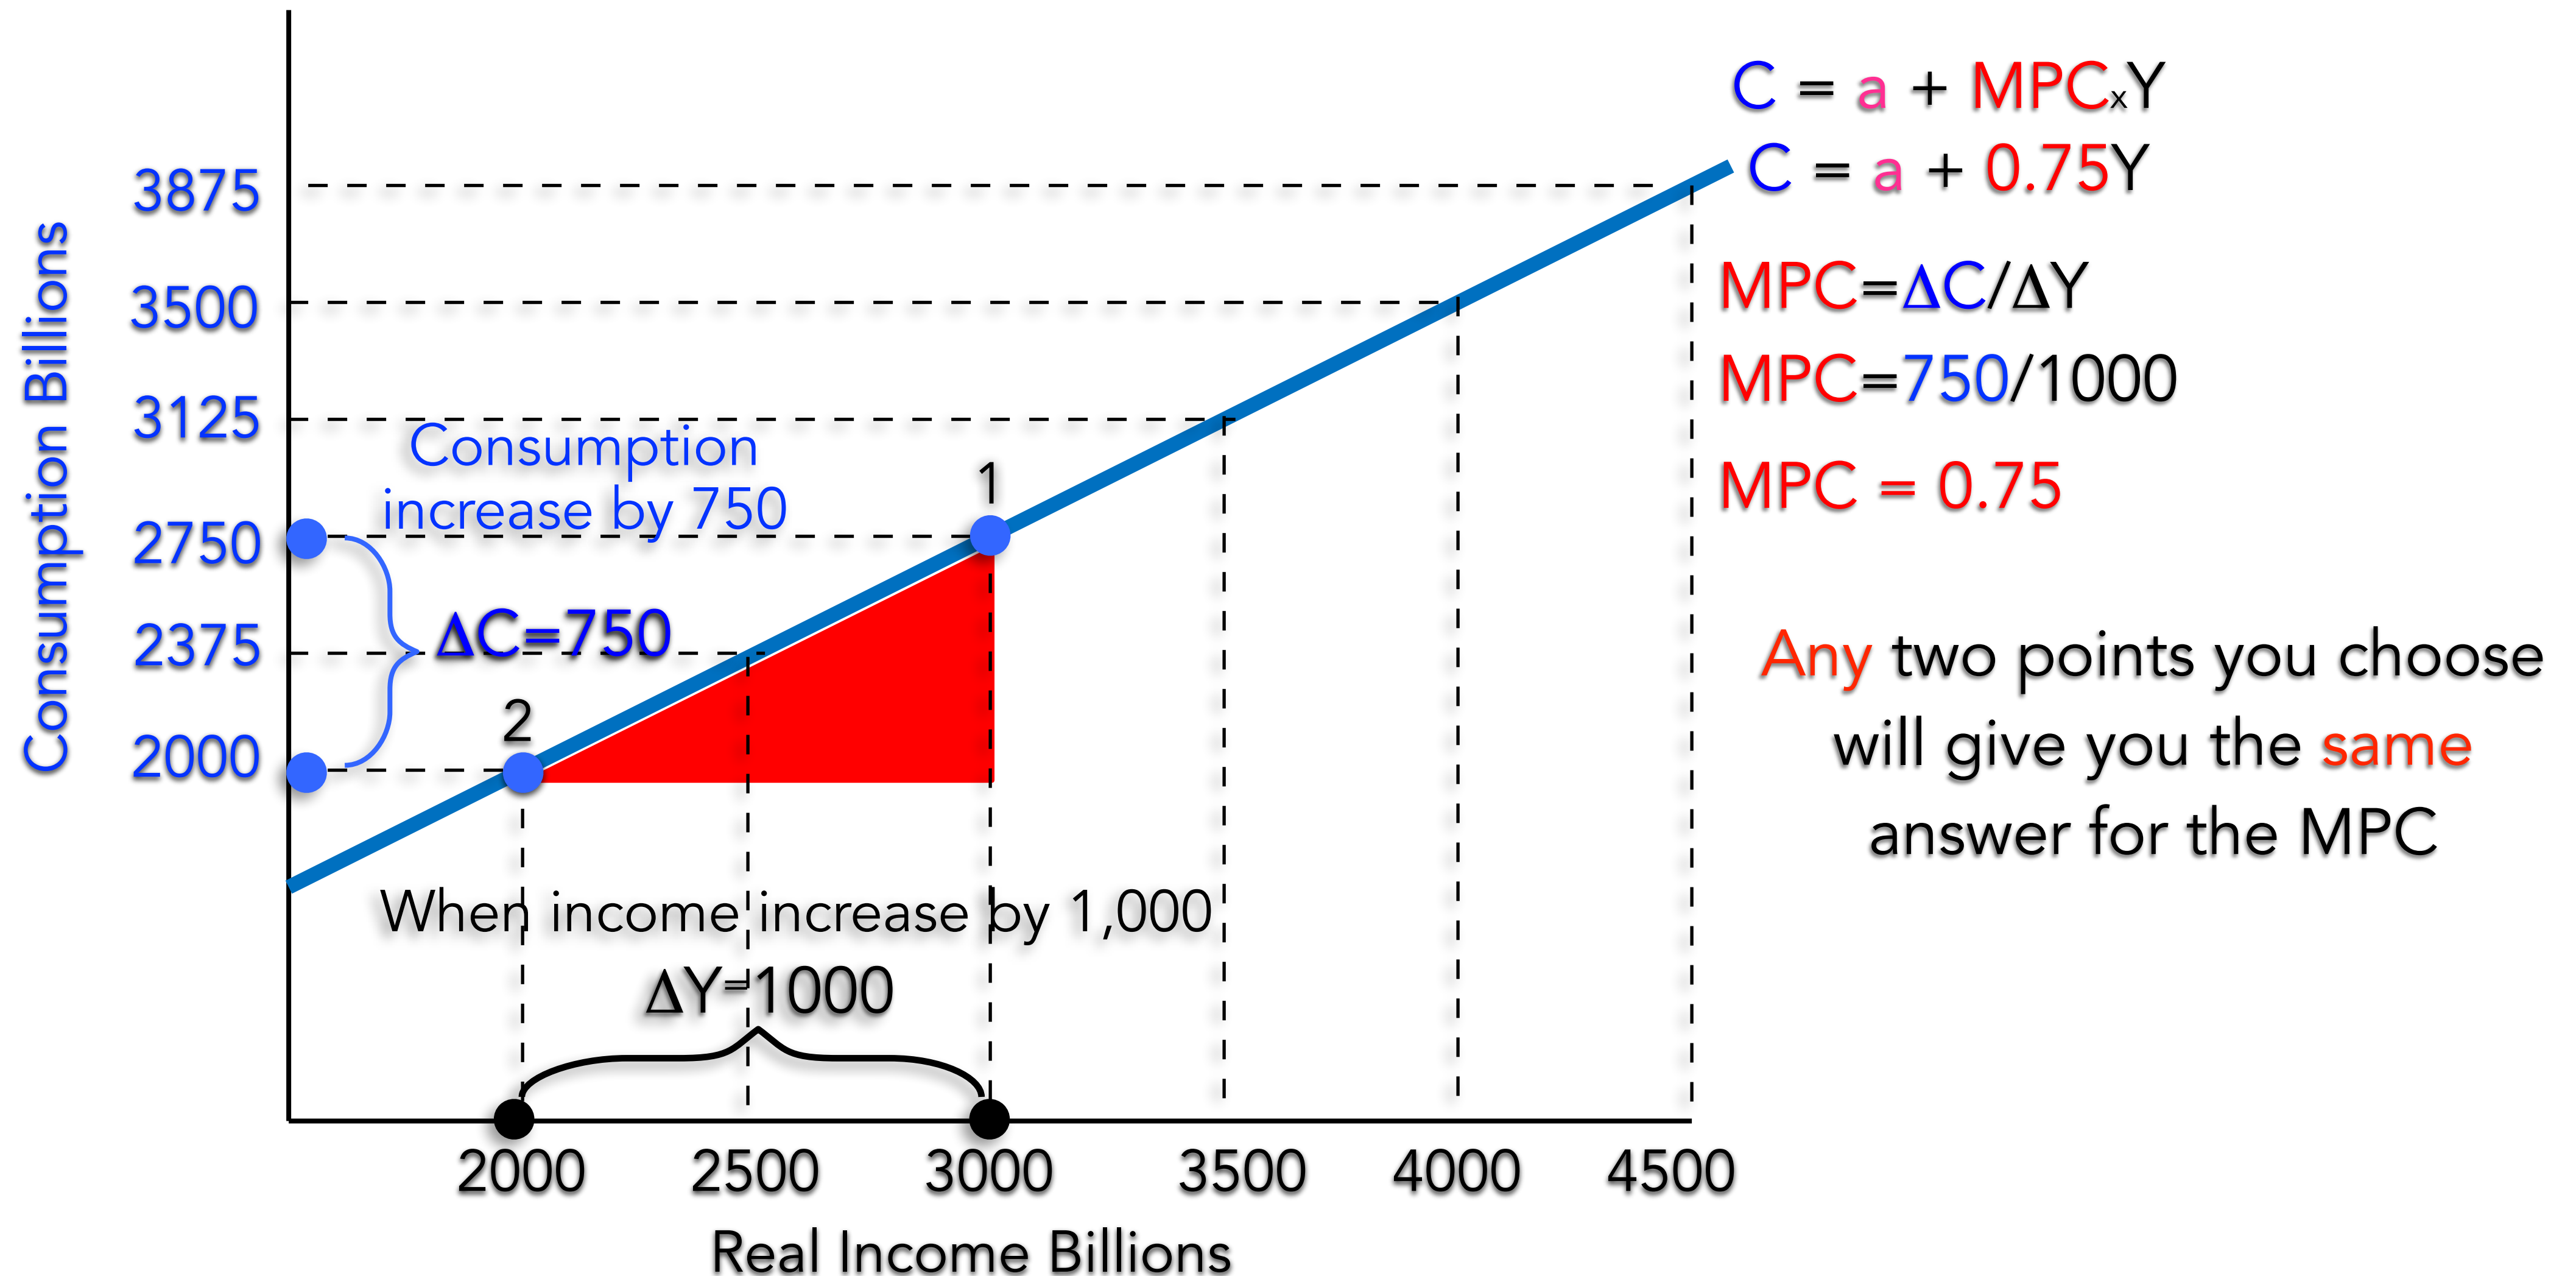

5

Y

Any two points you choose  
will give you the same  
answer for the MPC

# Calculating the ~~slope~~ <sup>MPC</sup>

Choose **any** two points

## Calculating the **intercept**
