

The deposit expansion depends on:

1. The amount of Excess Reserves held by banks.

2. Currency leak: loans leaking into currency held  
outside banks

# Money Multiplier

$(1/r)$

Gives the largest potential change in deposits: if there is zero currency leak and if banks hold zero excess reserves.

The **deposit** expansion depends on:

1. The amount of **Excess Reserves** held by banks.
2. Currency leak: loans leaking into currency held outside banks

**Money Multiplier**  
 $(1/r)$

Gives the largest **potential** change in deposits: **if** there is **zero** currency leak and **if** banks hold **zero** excess reserves.
