

Real Expenditure
(billions of dollars per year)

1. GDP = ?

2. Is total spending larger than/smaller than/equal to Output?

3. Do Inventories fall, rise or remain unchanged?

4. Does the economy experience a recessionary/inflationary gap?

5. What is the size of the gap?

6. How can the gap be closed?

Assume the
Economy is at
Equilibrium

GDP=4,000

AE_1

$$AE = 4,000$$

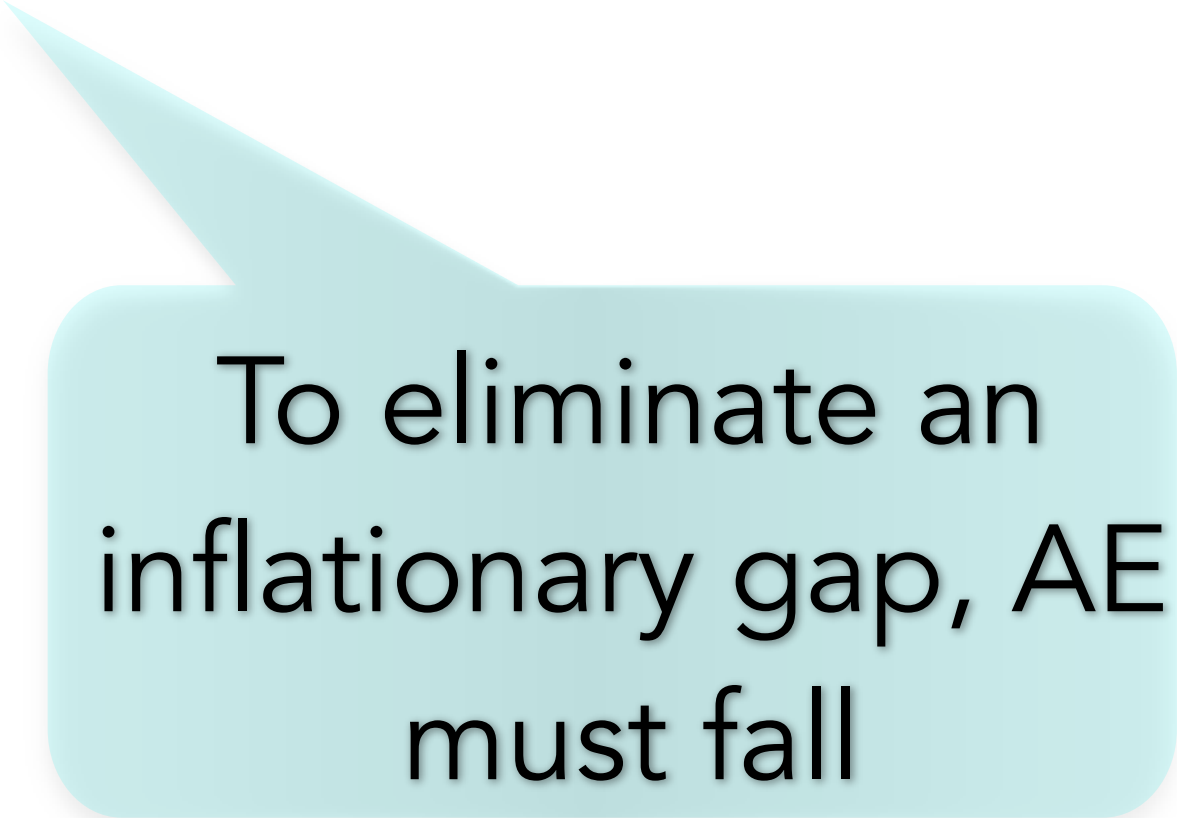

GDP=3,000

$$\text{Gap} = 3,000 - 4,000 = -1,000$$

To eliminate an
inflationary gap, AE
must fall

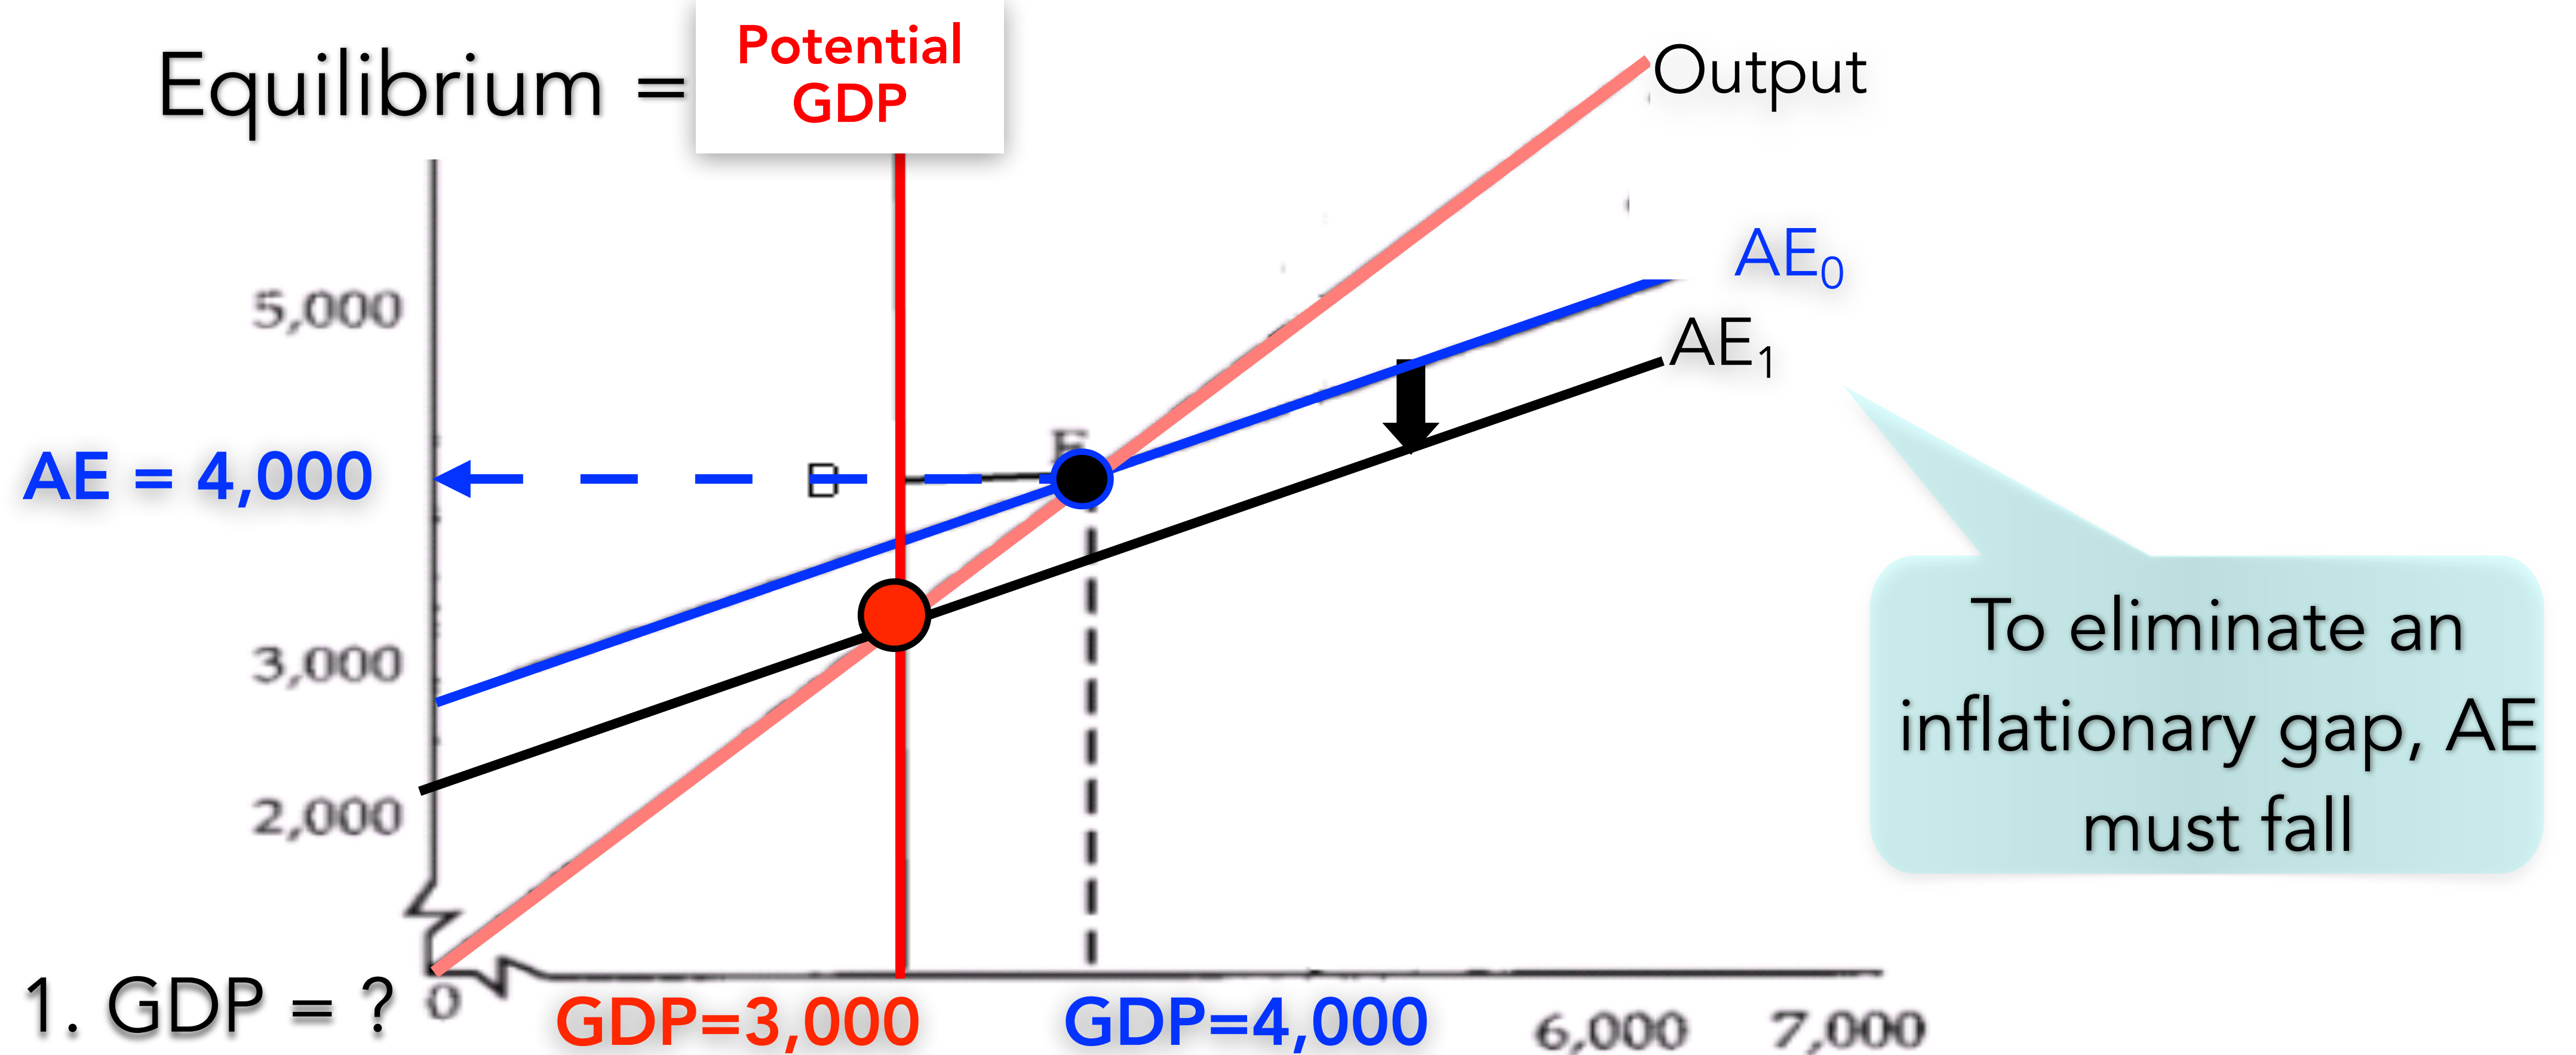

Equilibrium =

AE₀

**Potential
GDP**

Output

1. GDP = ?
2. Is total spending larger than/smaller than/equal to Output?
3. Do Inventories fall, rise or remain unchanged?
4. Does the economy experience a recessionary/inflationary gap?
5. What is the size of the gap? $Gap = 3,000 - 4,000 = -1,000$
6. How can the gap be closed?
