

Because items and quantities in the basket are
fixed, the CPI does not account for differences
in quality

Cause of this mistake: CPI does not account for improvements
in quality

We do not calculate the CPI correctly: Quality Bias

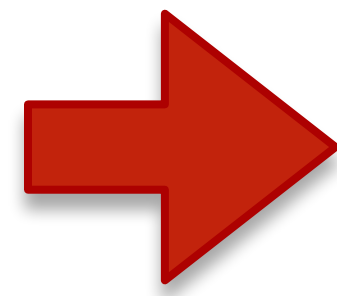

Solution: Use "Chained CPI which
uses a basket that changes from
month to month

We **do not** calculate the CPI correctly: **Quality** Bias

Because items and quantities in the basket are **fixed**, the CPI **does not account for differences in quality**

Cause of this mistake: CPI does not account for improvements in quality

Solution: Use "**Chained** CPI which uses a basket that changes from month to month

Traditional CPI vs. Chained CPI
