

Elastic

$$|e| > 1$$

$$|e| = 1$$

$$|e| < 1$$

Inelastic

Price elasticity of Demand

Income elasticity of Demand

Measures the size of the shift

Measure the size of the change in Q^d
relative to the change in Price

Price_{good X}

Q_d_{good X}

Income
Elasticity for
Inferior Goods is
Negative

When Income
Increase

Demand for Normal
Goods increase

When Income
Increase

Demand for Inferior
Goods decrease

Income elasticity of Demand

Measures the size of the shift
