70%

70%

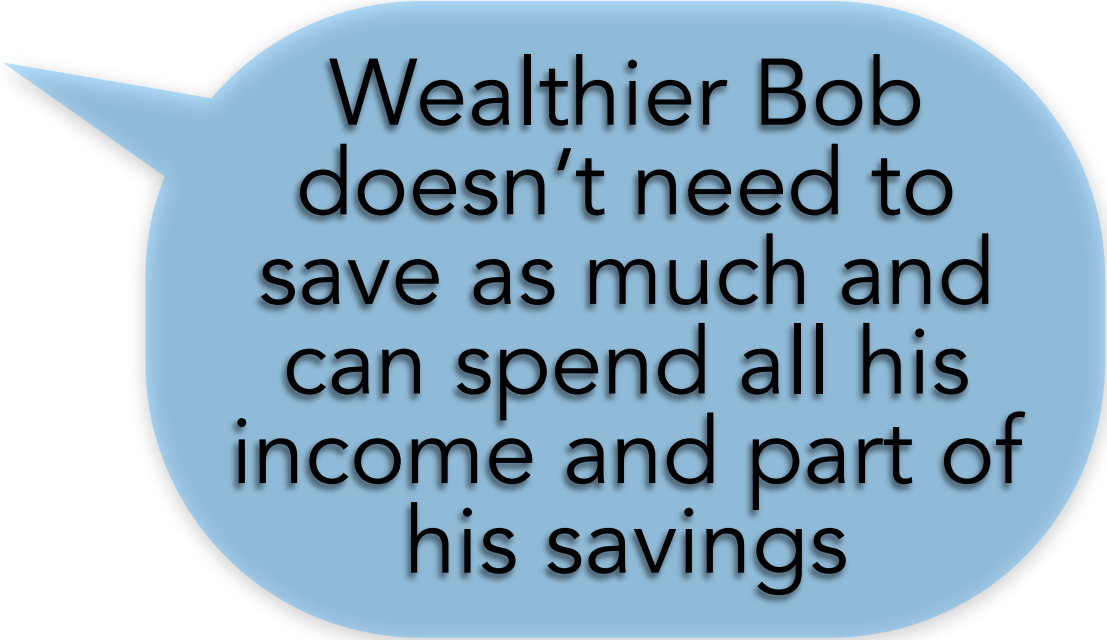

70%

For all, the MPC = 70%

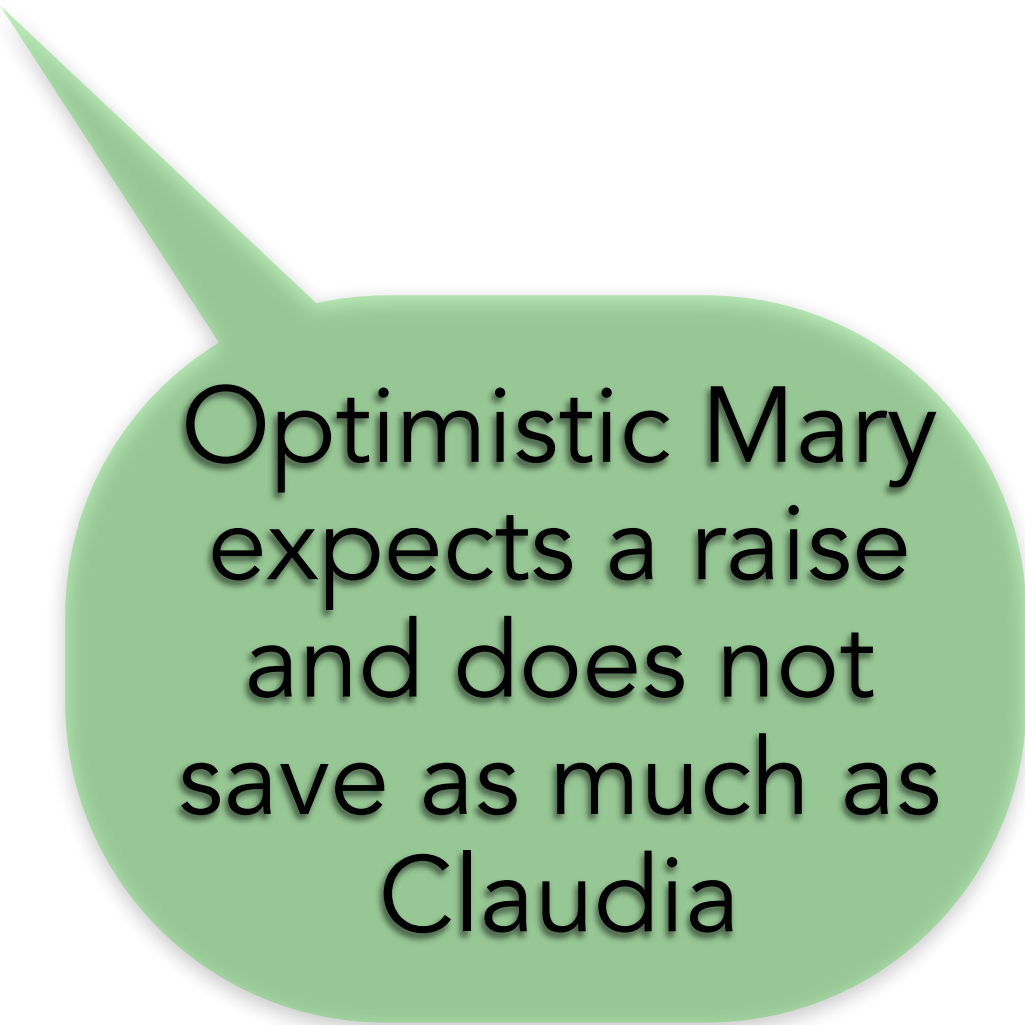

These three individuals react the **same** to a \$1,000 increase in income

Their
consumption
line is higher: a
larger intercept

Wealthier Bob
doesn't need to
save as much and
can spend all his
income and part of
his savings

CMary

Optimistic Mary
expects a raise
and does not
save as much as
Claudia

Income is the
same for all
three

A pink speech bubble with a tail pointing towards the top right corner. Inside the bubble is black text.

Claudia earns
\$10,000 and
spends only
\$9,000

Mary earns
\$10,000 and
spends all of it!

Bob earns
\$10,000 and
spends more
than \$10,000

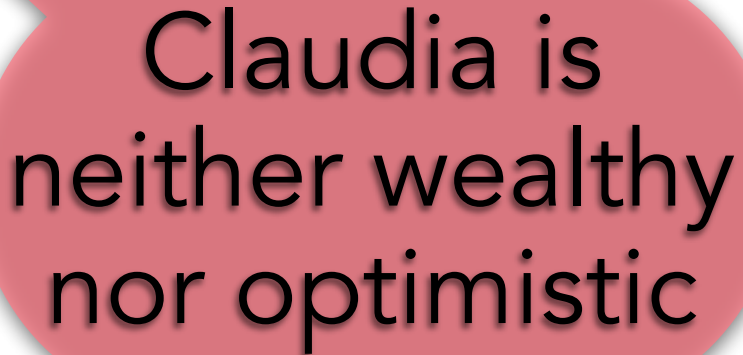

Why is their
spending
different?

Claudia is
neither wealthy
nor optimistic

1,000

Wealthier/optimistic individuals spend more of their income

Wealthier/optimistic individuals spend more of their income

For all, the $MPC = 70\%$
