Price Control: The  
minimum price is  
\$0.80/pound

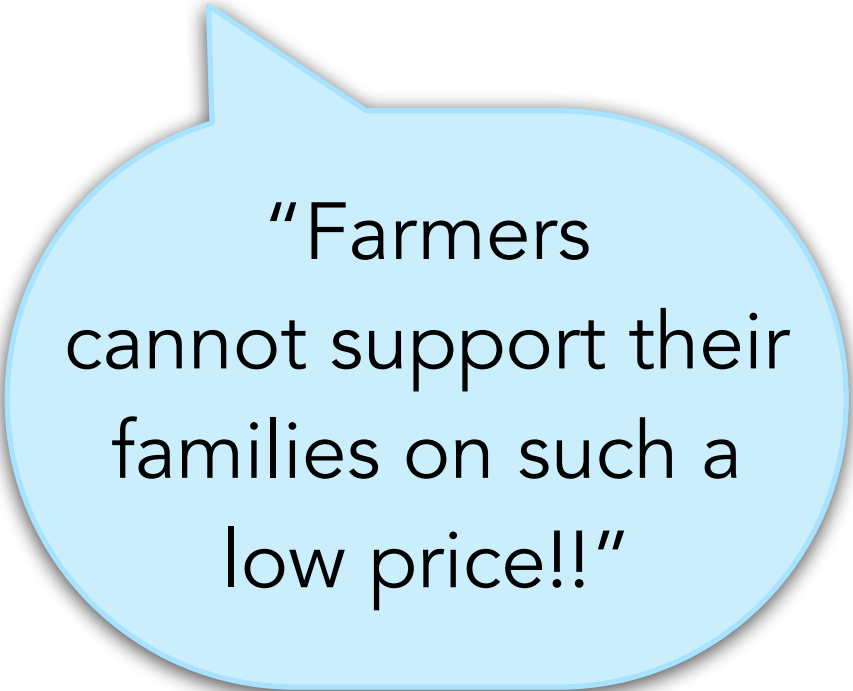

Price Floor

All these prices are  
now prohibited

Prevents price  
from reaching  
equilibrium

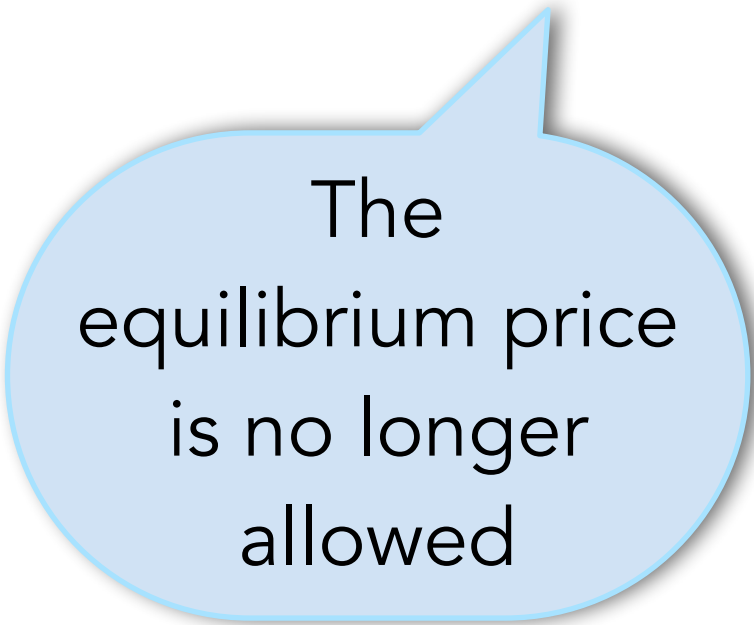

"Farmers  
cannot support their  
families on such a  
low price!!"

If the market is allowed to clear, farmers will get 50 cents/pound

cause a surplus

Suppliers (farmers) ask the government to impose price support

The  
equilibrium price  
is no longer  
allowed

Surplus

# Consider the Corn Market

Price Control: The minimum price is \$0.80/pound
