### Consumer Actually pays 40 x 7

# CS

### The difference between "value" to the consumer and what s/he actually pays is Consumer Surplus

# Consumer buys 7 units

#### If the price is 40 per unit 40

# Area = $\frac{\text{(Base x Height)}}{2}$

### To calculate Consumer Surplus, we can also calculate the area for this triangle:

### The area of a triangle is calculated using the formula:

Height

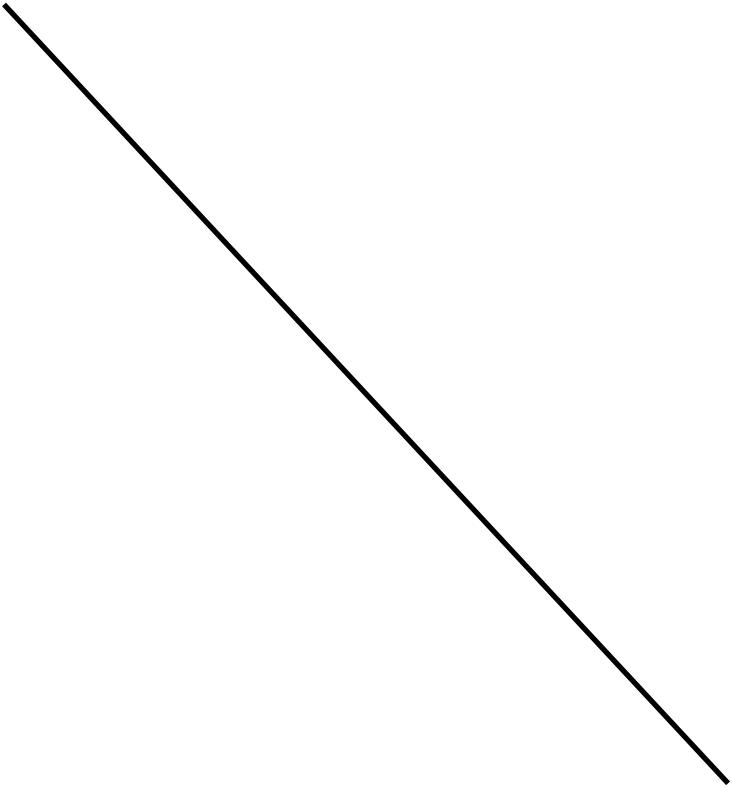

### CS

Base

$$CS = \frac{7 \times (110 - 40)}{2}$$

$$CS = \frac{7 \times 70}{2}$$

To calculate Consumer Surplus, we can also calculate the area for this triangle:

The area of a triangle is calculated using the formula:

Area = 
$$\frac{\text{(Base x Height)}}{2}$$

$$CS = \frac{7 \times (110 - 40)}{2}$$
