

Area = $\frac{\text{(Big base + Small base)} \times \text{height}}{\text{(Big base + Small base)}}$

To calculate how much the consumer is willing to pay for 7 hours of cell phone service, we calculate this area:

The formula to calculate this area is:

To calculate how much the consumer is willing to pay for 7 hours of cell phone service, we calculate this area:

The formula to calculate this area is:

Area =
$$\frac{\text{(Big base + Small base) x height}}{2}$$
