

Real Income Billions

_ _ _ _ _ _ _ _ _ _ _ _ _ _ _

 $C = a + MPC_xY$

Choose any two points

$\Delta Y = 1000$

$MPC = \Delta C/\Delta Y$

Calculating the slope

MPC = 750/1000

MPC = 0.75

When income increase by 1,000

Consumption increase by 750

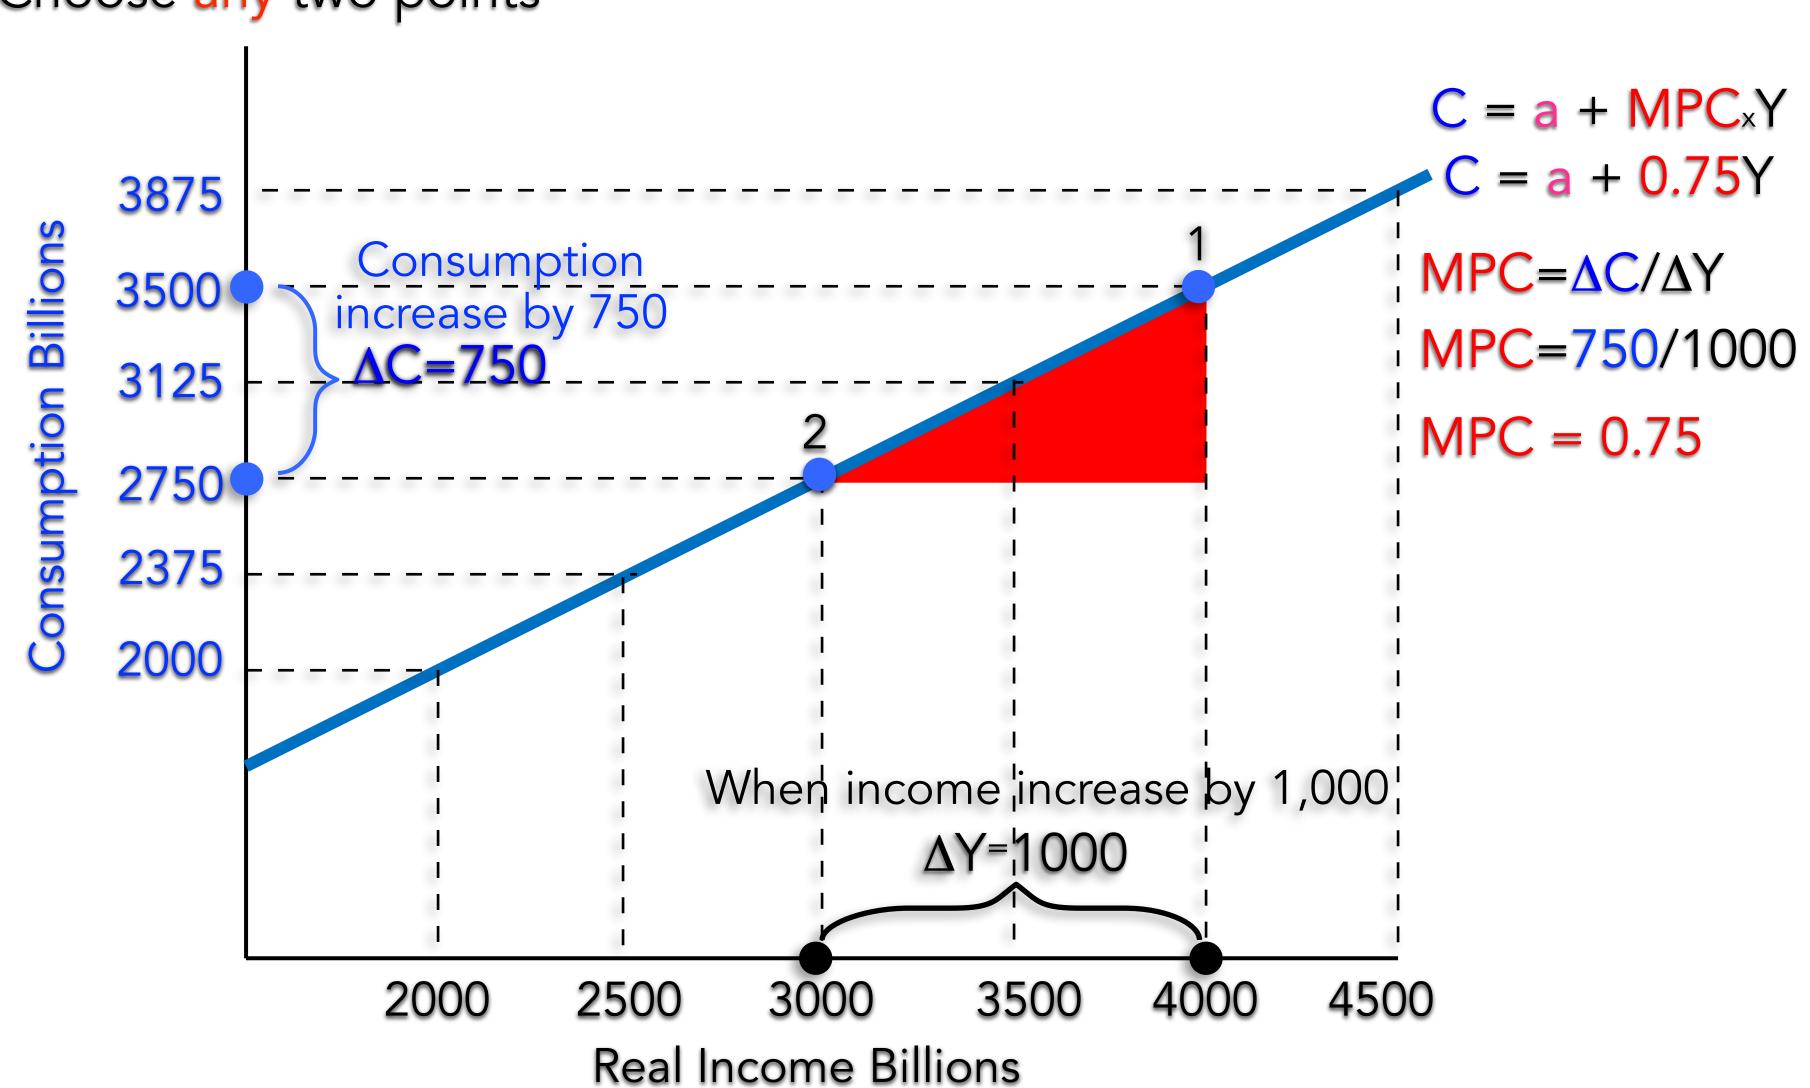

C = a + 0.75Y

Calculating the slope
