

28,000 diaries sent to a sample of U.S. households and 60,000

interviews determine:

1. Which goods and services are most common among U.S. consumers: What to include?

2. What is the most common number: How many?

The Consumer Price Index

Tracks change in prices over time for a basket of basic necessary goods and services

The Consumer Price Index Tracks change in prices over time for a basket of basic necessary goods and services
