You lend \$4,000 at 10% in 2012 and the loan is paid back in 2014

Tax on Interest Income is 30%

Tax you owe \$	$5400 \times 0.30 = 120$
----------------	--------------------------

Interest Income = 4,000*0.1=\$400

CPI = 210CPI = 2002012 → 2014

Real Value =	4400 210	x 100 =	2,095.2
eal Value =	210	$- \times 100 =$	2,095.2

_ _ _ _

You pay 126% instead of the 30% you are supposed to pay by law

120	x 100 = 126% effective tax!
95.2	

Even though your Real Interest Income was only \$95.2 the government still makes you pay \$120

Real Value = $\frac{4000}{2000}$ x $100 = 2000$
Real Value = $\frac{1000}{200}$ x 100 = 2,000

Your Real Interest Income = 2,095.2 - 2,000 = 95.2

In real terms, the borrower got \$2,000 and returned 2,095.2

You lend \$4,000 at 10% in 2012 and the loan is paid back in 2014

Interest Income =
$$4,000*0.1=$400$$

Tax on Interest Income is 30% instead of the 30% you are supposed to pay by law

CPI = 200

CPI = 210
 2012
 2014

Real Value = $\frac{4000}{200}$ x 100 = 2,000 Real Value = $\frac{4400}{210}$ x 100 = 2,095.2

In real terms, the borrower got \$2,000 and returned 2,095.2

Your Real Interest Income = 2,095.2 - 2,000 = 95.2

Even though your Real Interest Income was only \$\frac{120}{95.2} \text{ x 100} = 126\% effective tax!
