Comparing the Contestable Market and Cartel Models

◆The stronger the ability of oligopolists to collude and prevent entry, the closer the oligopoly price would be to the monopoly price

The weaker the ability to collude and to prevent entry, the closer the oligopoly price would be to perfectly competitive pricing

◆Most oligopoly markets lie between these two extremes.

Comparing the Contestable Market and Cartel Models

- ◆The stronger the ability of oligopolists to collude and prevent entry, the closer the oligopoly price would be to the monopoly price
- ◆The weaker the ability to collude and to prevent entry, the closer the oligopoly price would be to perfectly competitive pricing
- ◆Most oligopoly markets lie between these two extremes.
